VCAP602 Quick Installation Guide for Windows Windows 7

1. Driver setup

Step 1: Uninstall the old driver and reinstall the new driver

IMPORTANT! -IF YOU HAVE INSTALLED THE DRIVER FOR OTHER VIDEO CAPTURE DEVICES, PLEASE UNINSTALL THEM AND THEN REINSTALL THE DRIVER FOR VCAP 602 FROM THE ENCLOSED SOFTWARE CD

1)make sure login as "administrator" to install driver/software

2) UNINSTALL all the drivers/software for your old USB video capture

Step 2: Insert the software CD into CD/DVD Drive. Windows 7 will ask you if you'd like to "Run VCAP602.exe" or "Open folders to view files". Please choose "Run VCAP602602.exe"

S AutoPlay

Always do this for software and games:	
Install or run program from your media ———	
Run VCAP602.exe Publisher not specified	
General options	
using Windows Explorer	
View more AutoPlay options in Control Panel	

Step 3: "User Account Control" will be shown on the screen

Please choose "Yes" when you are asked "Do you want to allow the following program from an unknown publisher to make changes to this computer?"

If it does not startup automatically, please run Drive\setup.exe from the software CD to get the startup menu.

Step 4: Please Click "Driver install" from the main menu

Step 5: Click "install" when the screen shows that "Ready to install the Program"

	InstallShield Wizard Complete The InstallShield Wizard has successfully installed Driver Install 64-Bit. Click Finish to exit the wizard.	
	< Back Finish Cancel	

Step 8: Please click "Finish" when the driver is installed.

Step 9: now plug the VCAP602 into one of the free working USB 2.0 port. Windows will automatically install the driver for the VCAP602. Please wait for a while until Winodws show you that "your device is ready to use" on the message bar at the right bottom.

Step 10: Check if the driver /hardware has installed successfully. Please go to

Start-->Control panel-->"Hardware and Sound"-->"Device Manager"--"Sound, Video and game controllers"

You will see USB 2.0 Video capture and USB 2.0 Audio capture are there and there are no yellow marks.

2. Install EZGrabber

From the main menu, choose "software install"

3. Install VHS2DVD 3.0

Click "Honestech VHS to DVD" on the main menu to install VHS2DVD 3.0. Please follow the instruction on screen to install it.

You will be asked to enter the license key when you use it the first time.

Please enter the key on the flap of the white software CD bag (holder/cover).

Please do check the key when you enter it. Some customers made mistake in entering the following letters and number:

U, V, Z, L, 2, 1,B (they entered U as V, Z as 2, 1 as L, B as 8).

4. Setting for EZ Grabber

EZ Grabber is designed to capture video/take still photo while you playing the video on the video source device.

If you wish to edit the captured video, please use Software Honestech VHS 2 DVD.

 Video format and video source setting: Video format: for UK customers, please choose "PAL-BDHIG"

Video Source: Please choose "composite" if you use composite AV cable (yellow, red, white)

5. Basic Setting Honestech VHS to DVD

- 1) Video Device: Please choose "Conexant Polaris Video Capture"
- Input device setting: click the "setting" button beside the Video device, then you can set the Input device.

Please choose "composite" if you use composite AV cable (yellow, red, white)

Please choose "svideo" if you use Svideo cable + R/L for audio (red/white)

The Video source must be set to either 'Composite' or 'Svideo' depending on which connector you are using (the yellow phono connector is Composite and the black mini-DIN connector is s-video)

3)Video Standard setting: by clicking the "control button" and go to "Video decoder" you can choose different video standard for your video source device. For the UK customer, please choose PAL-I.

F Record and Burn	Maximum Recording Time (HDD) 09:58:17		

4)Audio device setting: You **DO NOT** need to choose any audio device since the chipset for our VCAP602 has combined video and audio together and the audio recording will be controlled by the video device.

- 5) Format: you can choose different format to save the captured file such as DVD/long DVD
- 6) Video Type: please choose PAL

7)Split Size: please choose the size that meets your needs

8) upload the captured video to YouTube (see picture below.)

9)transfer the captured video to IPOD and PSP

6. How to use VCR with VHS2DVD .30

If your source video device is VCR, you need to select "VCR INPUT" as well. For details, please refer to the setting below.

1)Input device setting: click the "setting" button beside the Video device, then you can set the Input device.

Please choose "composite" if you use composite AV cable (yellow, red, white)

Please choose "svideo" if you use Svideo cable + R/L for audio (red/white)

The Video source must be set to either 'Composite' or 'Svideo' depending on which connector you are using (the yellow phono connector is Composite and the black mini-DIN connector is s-video)

2)Video Standard setting: by clicking the "control button" and go to "Video decoder" you can choose different video standard for your video source device. For most of the UK customers, please choose "PAL-I".
